TYPHUS

No report of any case of Typhus was received during the week.

Explanation of symbols used :—C.—Cases ; D.—Deaths.

NEW DELHI 3 (INDIA) ; }
The 5th September, 1950 }

S. P. JAIN,
for Registrar General, India.

NATIONAL SAVINGS CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 12th August, 1950.

† Figures not available.

Explanation of symbols used :—B.—Births ; B. R.—Birth rate ; C.—Cholera ; S.—Smallpox ; F.—Typhoid ; F.—Fever ; D. D.—Dysentery and Diarrhoea ; R. D.—Respiratory Diseases ; M. D.—Maternal Deaths ; D. R.—Death Rate ; I. D.—Infantile Deaths (included in total deaths).

REMARKS

The figures of births and deaths shown in this statement for the week ending the 12th August, 1950 relate to 168 towns with an estimated population of 20,067 thousands. The total number of towns is 233 and their population is 28,421 thousands. Thus 72% of the total number of towns representing 71% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 14,423 and 7,952 representing birth and death rates of 37.4 and 20.6 per thousand of population respectively.

(A) States (Parts A & C).—The data here relate to 139 towns with an estimated population of 16,702 thousands. Information about Assam, Bihar, Madhya Pradesh and West Bengal could not be included. The total number of towns is 201 and their population is 24,668 thousands. Thus 69% of the total number of towns representing 68% of the total population is covered. The numbers of births and deaths recorded in these towns were 12,349 and 6,775 representing birth and death

rates of 38.4 and 21.1 per thousand of population respectively. The table at the end gives the position by States.

The towns of Cannanore and Palghat in Madras and Puri in Orissa recorded high death rates of 55.0, 50.3 and 53.2 per thousand of population respectively. In Cannanore and Puri, the high death rates were largely due to death from fevers, and in Palghat the high death rate was not due to any one of the specified causes.

(B) States (Part B).—The data here relate to 29 towns with an estimated population of 3,365 thousands. The total number of towns is 32 and their population is 3,753 thousands. Thus 91% of the total number of towns representing 90% of the total population is covered. The numbers of births and deaths were 2,074 and 1,177 representing birth and death rates of 32.0 and 18.2 per thousand of population respectively. Ernakulam in Travancore-Cochin was the only town which had a high death rate of 57.6 per thousand of population and this high death rate was not due to any one of the specified causes.
